Automate Your Advantage

Visual Annotate

Drill-down into the History of any Code Line in ClearCase Files

As a developer, team leader or QA engineer, have you ever asked youself:

- "Who inserted that line of source code?"
- "Where did this line of code come from? What was the source branch or stream?"
- "When was this line of code inserted? How can I find the lines which have been inserted recently?"

What do you do when you encounter a bug? Can you find the problem quickly?
Now you can find these answers and it's easier than ever!

Save your Time on Debugging

GoMidjets Annotate provides a source code viewer that colors each code line separately, depending on the criteria that you choose: by usernames, by dates or by versions. It also provides you with a special mode in which you can see removed lines. This feature helps you compare the same code line on different versions - even more than two versions simultaneously!

Advantages

- ✓ Easily locate the source of defects
- ✓ Improve collaboration among developers and R&D stakeholders
- ✓ Compare more than two versions at once
- ✓ Drill down into the history of any code line in a file
- ✓ Get all information about changes in the source-code context
- ✓ Produce higher quality products in less time
- ✓ Seamlessly integrated with ClearCase environments
- ✓ Applies ClearCase and SCM best practices

Visual Annotate supports Windows and is easily integrated with a variety of IDEs and IT platforms.
Visual Annotate is also integrated with GoMidjets R&D Reporter and ClearEnv as part of Agile Solution for ClearCase
